Draw your own math font

Each box on the following pages asks for one glyph. The small grey sample above the box shows which one; draw yours inside the box, without tracing it. A font made from this grid is all yours: it has the glyphs you draw and nothing else.

Compact grid: the boxes are about the size of handwriting, with an x-height near 4 mm.

The grid comes in three levels. Print only what you want to draw:

Level 1, the essentials: 322 glyphs, pages 2–5
Letters, digits, Greek, the usual symbols, and the sizes and pieces of tall delimiters.

Level 2, the math alphabets: 247 glyphs, pages 6–7
Bold, script, Fraktur and double-struck letters, and upright Greek.

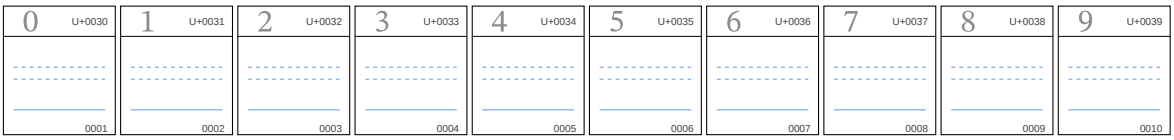

Level 3, everything else: 1704 glyphs, pages 8–17
The rarer operators, arrows and alphabets.

All three levels: 2273 glyphs, as many as STIX Two Math has in the blocks the catalog measures.

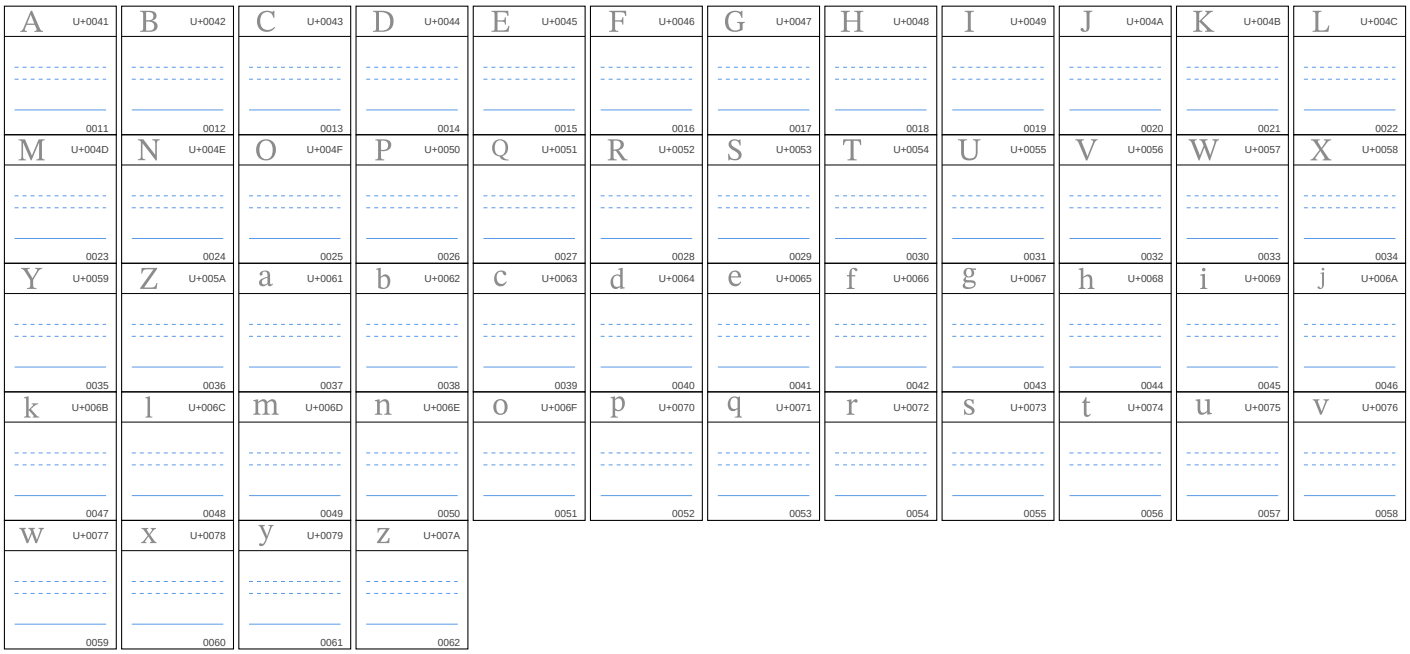

How to fill it

- Print at 100% (no "fit to page"), on white paper.
- Use a black pen or marker; a thick line scans better than a thin one.
- Sit letters on the solid blue baseline. The dashed lines are x-height and cap height.
- Stay inside the box. Leave the black squares in the corners: they straighten the photo.
- Pieces (in level 1) are parts mathra stacks to build a tall delimiter: draw them so that they join when stacked, with the stroke touching the top and bottom of the box.
- Want chalk? Draw with chalk on dark paper and say so: the photo gets inverted.
- Then photograph or scan every page, flat and well lit.
